E-Learning

Offering full range of learning content services including localization, designing knowledge portals in SharePoint, marketing collaterals, classroom based learning and eLearning courseware development.

Instructor led classroom training

Training for major international IT certification programs and variety of soft skills and Management Development programs. Apart from off-the-shelf standard programs, the academy offers bespoke training programs. We also offer programs that focus on developing young fresh Omanis, ready for employment.

Below is a brief of each of our offering:

IT Training

We offer holistic IT training that ranges from basic desktop productivity tools to complex and integrated IT business systems.

IITC is a

- **Microsoft** Certified Learning Solutions Partner
- **CompTIA** Authorized Learning partner
- **Cisco** Gold partner
- **Oracle** Gold Partner
- **Android** Authorized Training partner
- **IC3** Authorized Training partner
- Strategic partnerships with **PMI**, **VMware** and **ITIL** providers

The instructors at IITC are IT practitioners and IT trainers who design, deliver and monitor learning experiences that equip candidates to learn and apply cutting-edge technologies. We alter IT learning solutions to fit the specific requirements of the clients and their business environments. This approach proves to be appropriate for employees at any stage of the learning curve.

Soft Skills & Business Skills

We offer training consultancy that specializes in high quality training solutions and custom designed training programs that complement the technical and academic qualifications of the client's workforce.

We offer customized soft skills training sessions geared towards helping employees connect with their specific roles. The courses meet international standards and are designed for the local market.

Leadership & Management Development programs

We offer specialized leadership and management training that is designed to foster excellence among the team leaders, managers and senior managers of organizations. The training programs help improve key skills that when combined with the technical expertise results in the creation of inspirational managerial abilities.

The leadership and management training is designed for those employees in the organization who demonstrate technical and business skills and are on the path towards professional development into leadership or managerial positions.

Language & Communication programs

Our Language Training programs enable corporate clients promote the professional success and personal growth of their workforce.

Our strength lies in our ability to customize the language training programs to meet the specific needs of our clients. Our English language programs are designed to arm organization's Omani professionals with communication tools such as language comprehension, writing, grammar, vocabulary and other job related communication skills that are critical for their success. Arabic language programs are designed for

non-Arabic speakers, who are willing to learn and understand Arabic to make basic communication.

Employment Readiness & Skills Enhancement Programs

This offering focuses on imparting training to Omani nationals and preparing them to join the corporate workforce.

Influenced by the local market requirements and combined with international standards of IT and Business skills suite of training programs, these programs aim at enhancing the IT and business skills of trainees and employees across all levels. Our training programs are designed to meet the client's specific needs which in turn allow their workforce to attain personal as well as organizational goals.

Technical programs for Water sector

We deliver training programs in water sector in association with our French partner. The programs are related to Drinking Water, Sanitation Systems, Water & Sludge management, technical water networks, water treatment laboratory tests etc.

Technical programs for Railway sector

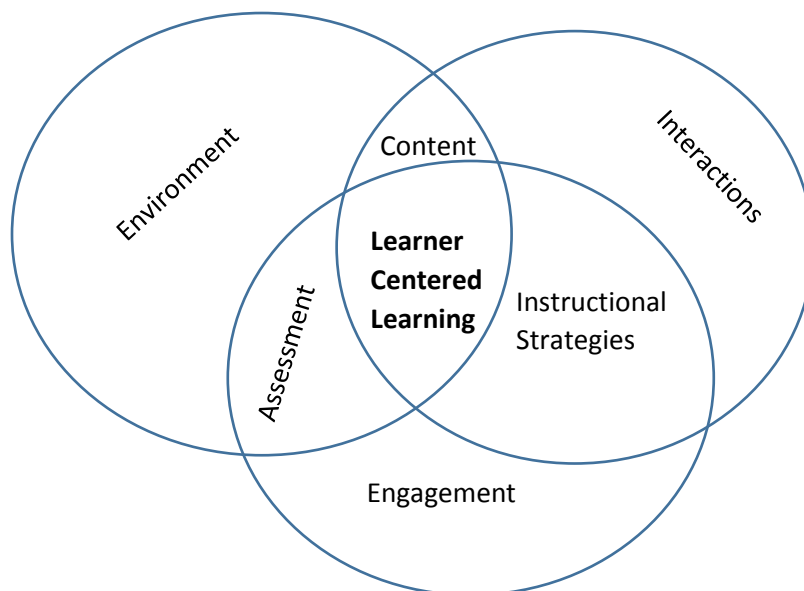

In association with our Spanish partners we have delivered various programs familiarizing the young professional engineers of Oman Rail with technical and professional skills required in the railway sector.

Training Team

Team of multi-cultural, technology savvy professionals with domain knowledge from across various domains. The trainers are **certified and experienced professionals**, trained to deliver quality programs to large corporate and government customers.

Interactive and Engaging Approach to Learning

People learn best when actively involved in the learning process, and when they can clearly see the connection between what is being taught and their real world. To effectively engage delegates and maximise the transfer of skills and knowledge, we utilise a variety of instructional techniques and learning methods. Our instructional approach is highly skewed to interactive learner-centered learning methodologies which engage the delegates fully in the learning process.

Facilities

Our training facilities are world-class. The center has eight state-of-the-art classrooms having high configuration HP Compaq Elite 8300 machines with 16 GB RAM and i7 processor. The classrooms can accommodate 16-18 participants. Each classroom is equipped with modern training infrastructure, which includes 24*7 wireless internet connection, high quality 55" LEDs and very comfortable seating.

The training center has a seminar hall, dedicated prayer hall separately for ladies and men and also has a fully equipped cafeteria with very pleasing ambience. The center has a dedicated library and a welcoming reception.
